ABOUT ME

Blockchain & Full-Stack Developer with 3 years of experience in Ethereum, Binance Smart Chain, and 6+ months in Algorand. Skilled in smart contracts, DApps, and blockchain architecture using Algorand SDK, AlgoPy, and ARC4. Proficient in **web development (React, Next.js, Node.js)** and **mobile app development (React Native, Expo)**, delivering secure, scalable, and user-friendly solutions.

WORK EXPERIENCE

BLOCKCHAIN ENGINEER – AAM TECH HUB – 07/05/2025 – Current – MULTAN, PAKISTAN

Responsibilities:

- Developed smart contract logic for **AAM Token payments** within the AAM ecosystem.
- Worked on a **custodial wallet system** to securely manage user assets on-chain.
- Contributed to **wallet-side asset handling**, including on-chain transaction signing and storage.
- Designed **token transaction flow** and implemented core **contract-based fund management**.
- Participated in the **architecture of AAM Token integration** with a centralized exchange.
- Ensured **secure handling of user funds and transactions** using blockchain best practices.
- **Designed and developed wallet UI/UX in React Native**, focusing on user-friendly navigation and real-time balance updates.
- Built **frontend interfaces in React** for AAM Token management and admin dashboards.
- Integrated **smart contract functionalities** (balance check, transfers, and payment flows) into the frontend.
- Worked on **API connections and state management** to sync blockchain data with frontend components.

Key Projects:

- **AAM Token Payments** – On-chain payment logic for token-based purchases.
- **AAM Custodial Wallet** – Asset handling, transaction flow, and React Native wallet app design.
- **AAM Exchange (Ongoing)** – Smart contract logic and fund management integration with frontend dashboards.

Tech Stack:

- **Blockchain:** Ethereum, Binance Smart Chain (BSC), Polygon (ERC-20)
- **Smart Contracts:** Solidity
- **Frontend:** React, React Native
- **Tools:** Hardhat, Remix, Ethers.js (for testing only)
- **Security:** On-chain fund management, transaction validation, role-based permissions

BLOCKCHAIN ENGINEER – OCTALOOP TECHNOLOGIES – 03/12/2024 – 28/04/2025 – ISLAMABAD, PAKISTAN

Responsibilities:

- Developed and deployed secure staking and farming contracts on Algorand.
- Built a decentralized NFT marketplace with escrow and auction features.
- Integrated ARC4 standards for transparent NFT auctions.
- Optimized smart contracts for gas efficiency and low transaction costs.
- Ensured secure fund flows using atomic transactions and on-chain validation.

Key Projects:

- **Staking & Farming System:** Yield-generating smart contracts with asset locking and reward distribution.
- **NFT Marketplace:** Decentralized platform with auctions, bid tracking, and automated settlements.

Tech Stack:

- **Blockchain:** Algorand (PyTeal, Algopy)
- **Smart Contracts:** TEAL, ARC4
- **Frontend/Backend:** React.js, Next.js, Node.js, Express.js
- **Database:** MongoDB
- **Wallets:** Algorand Wallet, MyAlgo

BLOCKCHAIN ENGINEER – TELGATES INC. – 05/08/2023 – 10/11/2024 – LAHORE, PAKISTAN

Responsibilities

- Developed EVM smart contracts for DeFi, staking, vesting, and token swaps.
- Built NFT marketplaces with on-chain royalties and multi-currency support.
- Performed smart contract audits and enforced security best practices.
- Integrated Chainlink oracles and decentralized governance frameworks.
- Used Hardhat, Foundry, and Truffle for development and deployment.
- Deployed contracts on Ethereum, BSC, Polygon, and Arbitrum.
- Implemented cross-chain bridges and interoperable token transfers.
- **Designed and developed full-stack DApps with React, Next.js, and Node.js.**
- **Built cross-platform mobile applications using React Native & Expo, integrated with blockchain backends.**

Key Projects

- **ImpactoMoney Charity:** NFT-based donation system with traceable stablecoin vouchers.
- **NFT Marketplace:** Decentralized platform with minting, bidding, and multi-chain support.
- **Token Vesting:** Structured token unlocks on Ethereum & Algorand.
- **Staking Protocol:** Auto-compounding and penalty-based withdrawal contracts.
- **Token Launchpad:** ICO contract with whitelist and vesting mechanisms.
- **DApp Development:** Web and mobile apps for interacting with DeFi protocols and NFT platforms.

Tech Stack

- **Languages:** Solidity, Python (Algopy/PyTeal), JavaScript, TypeScript
- **Platforms:** Ethereum, Algorand, BSC, Polygon, Arbitrum
- **Tools:** Hardhat, Foundry, Truffle, Next.js, React, Node.js, Express, React Native, Expo
- **Core Features:** Staking, Vesting, NFT Marketplaces, Token Swaps, DAOs, Web & Mobile DApps
- **Security:** OpenZeppelin, Slither
- **Interoperability:** Cross-chain bridges, Multi-token support
- **Infrastructure:** Chainlink, The Graph, IPFS

EDUCATION AND TRAINING

01/09/2020 – 15/09/2024 Vehari, Pakistan

BACHELORS IN SOFTWARE ENGINEERING COMSATS University Islamabad Vehari Campus., 61100 Vehari (Pakistan)

01/07/2018 – 22/09/2020 Vehari, Pakistan

FSC (PRE-ENGINEERING) Govt. Post Graduate College Vehari., 61100 Vehari (Pakistan)

01/03/2016 – 21/07/2018 Vehari, Pakistan

MATRICULATION(SCIENCE) Govt. Model Higher Secondary School Vehari., 61100 Vehari (Pakistan)

05/2024 – 06/2024

BECOME A SOFTWARE TESTER Udemy

08/2023 – 11/2023

BLOCKCHAIN SPECIALIZATION coursera

07/01/2023 – 10/03/2023

BLOCKCHAIN ENGINEER Althash University , Chicago
